DETAILED ACTION

1. This Office Action is responsive to Applicant's Amendment filed on 07/07/05. Claims 1, 8 and 9 have been amended, claims 7, 10-17 and 19 have been canceled, and new claims 20-30 have been added. Claims 1-6, 7-8, 18 and 20-30 are currently pending.

2. The indicated allowability of claim 18 is withdrawn since this claim would has been rejected as being unpatentable over Otaki et al (US 6,328,667) in view of Lansdale (US 5,013,050). Note that new independent claim 20 corresponds to the original claim 1 including all the limitations of claim 18.

Claim Rejections - 35 USC § 103

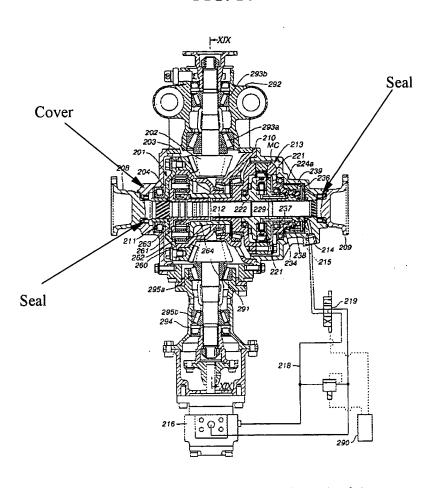

- 3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:
 - (a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.
- 4. Claims 20-25 are rejected under 35 U.S.C. 103(a) as being unpatentable over Otaki et al (US 6,328,667) in view of Lansdale (US 5,013,050).

Otaki et al disclose a dive axle assembly for a motor vehicle (see Fig. 14) comprising a support beam member (292), a differential assembly module (201) secured to the support beam member, a pair of axle shaft members (208, 209), and a cover member (see inserted Fig. 14 on next page) fastened to the support beam and having two coaxially spaced access openings therein

Application/Control Number: 10/695,958

Art Unit: 3681

FIG. 14

for receiving the axle shaft members (208, 209) therethrough, each of the access opening provided with a sealing device (see the inserted Fig. 14).

Otaki et al do not show the sealing devices being adjustable relative to the cover member.

Lansdale discloses an adjustable sealing flange device (54, 56) (see Fig. 3) provided on the cover member (52) to seal an interior cavity within the cover member between the access opening and the rotating shaft (50), wherein the adjustable sealing flange device (54, 56) is adjustable relative to the cover member.

Art Unit: 3681

It would have been obvious to one of ordinary skill in the art at the time the invention was made to replace the sealing device of Otaki et al by the adjustable sealing flange device of Lansdale so that the seal can be properly centered relative to the shaft center because the function of the seal will be adversely affected if the gap to be sealed is wider on one side than the other (col. 1, lines 22-27).

Note that the modified drive axle assembly would have all the features recited in claims 21-25. Further, the cover member would be provided with a plurality of holes for fastening the sealing flange device to the cover as taught by Lansdale.

Allowable Subject Matter

Claims 1-6, 8, 9, 18, 29 and 30 are allowed.

5. Claims 26-28 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Communication

Submission of your response by facsimile transmission is encouraged. The fax phone numbers for the organization where this application or proceeding is assigned are (571) 273-8300. Recognizing the fact that reducing cycle time in the processing and examination of patent applications will effectively increase a patent's term, it is to your benefit to submit responses by facsimile transmission whenever permissible. Such submission will place the response directly in our examining group's hands and will eliminate Post Office processing and delivery time as well as the PTO's mail room processing and delivery time. For a complete list of correspondence not permitted by facsimile transmission, see M.P.E.P. 502.01. In general, most responses and/or amendments not requiring a fee, as well as those requiring a fee but charging such fee to a deposit account, can be submitted by facsimile transmission. Responses requiring a fee which applicant is paying by check should not be submitting by facsimile transmission separately from the check. Responses submitted by facsimile transmission should include a

Application/Control Number: 10/695,958

Art Unit: 3681

Certificate of Transmission (M.P.E.P., 512). The following is an example of the format the certification might take:

I hereby	certify that this correspond	ndence is being f	acsimile transmitted to
the Pater	nt and Trademark Office	on	
		(Date)	_
Typed o	or printed name of person	signing this certi	ficate:
	•		
((Signature)		

If your response is submitted by facsimile transmission, you are hereby reminded that the original should be retained as evidence of authenticity (37 CFR 1.4 and M.P.E.P., 502.02). Please do not separately mail the original or another copy unless required by the Patent and Trademark Office. Submission of the original response or a follow-up copy of the response after your response has been transmitted by facsimile will only cause further unnecessary delays in the processing of your application; duplicate responses where fees are charged to a deposit account may result in those fees being charged twice.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Ha D. Ho whose telephone number is 571-272-7091. If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Charles Marmor can be reached on 571-272-7095.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
